Work Experience

DYNAWORTH INTERNATIONAL CO.,LTD.
Mar 2022 - May 2025

- **Skills** - HTML, CSS, JS
- Developed and maintained internal tools and client-facing web pages using HTML, CSS, and JavaScript to streamline scheduling and communication processes.
- Implemented a custom calendar system that reduced scheduling conflicts by 30% and improved meeting punctuality across departments.
- Collaborated with marketing and operations teams to build landing pages and update digital content, enhancing user engagement.
- Used analytics tools to assess site performance and iteratively improve layouts, contributing to a 10% increase in repeat business within three months.
- Earned positive feedback for improving digital resource accuracy and responsiveness to client needs.

Projects

Alt Architects – Architecture Studio Website
Skills - Next.js, TypeScript, Tailwind CSS , Grids
- Designed and developed a responsive, visually polished website using Next.js with TypeScript and Tailwind CSS to showcase a fashion studio's identity
- Focused on creating a minimalist, modern design and optimized images with next/image for faster load times and sharper quality.
- Learned to effectively structure layouts using CSS Grid and Tailwind's grid utilities to achieve a clean, flexible, and balanced visual hierarchy.
- Learned to combine clean UI with saleable code structure, refining my skills in building pixel-perfect designs with real-world branding needs
- https://rougeamsterdam.netlify.app/

Alt Architects – Architecture Studio Website
Skills - Next.js, TypeScript, Tailwind CSS, GSAP
- Built a sleek, high-end website for an architecture studio, emphasizing aesthetic storytelling through smooth layouts and transitions.
- Learned and applied basic animation techniques using Tailwind and React libraries to enhance user interactions with subtle motion effects.
- Focused on performance, responsive design, and a consistent brand experience across all devices, leveraging Next.js best practices.
- Strengthened my frontend engineering skills by balancing advanced UI details with clean, maintainable code.
